

PCAC v1.20

TODO STATEMENT

PCAC v1.20

TODO STATEMENT

Last Updated 1/18/2001

- * dutch auction (better support)
- * fix proxy bidding
- * allow pre-approving of bidders
- * Add more accounting features such as boldface type, gallery, etc.
- * Add cookie checking, if people don't have cookies enabled they won't be able to log in and get nasty errors
- * merge myauction/mybids pages for similar look & feel
- * private auctions (real private auctions & just hidden names)
- * add language pack, I'll need some volunteers to translate once I build the english language module

Completed as of 12/11/2000

- * ability to add to the item description after auction has started
- * make comments more accessible
- * filter out expired auctions
- * email verification a.l.a. ebay
- * add 'view sellers other auctions'
- * display current high bidder on auction page
- * finish imaging options

Completed as of 8/22/2000

- * Administration --> can now suspend users
- * Add check so you can't bid for an item you put up for auction, no shill bidding
- * Add account table, so you can make money off this (charge \$XX per auction or \$XX for having the product featured)
- * Add color scheming to config.ini so color changes are made by changing one variable in file
- * improve documentation
- * Add checking in sql so it won't pick out items that aren't up for auction in featured.php3
- * Add dynamically generated functionality to featured.php3
- * Add file upload capability
- * make 2 versions of featured.php3, buy.php3, sell.php3 to account for people who want to use file uploading and those who don't and people who want to use thumbnails and those who don't
- * Add Proxy bidding capability, need a bit of work
