

Nuget Packages Configuration for Student Management System

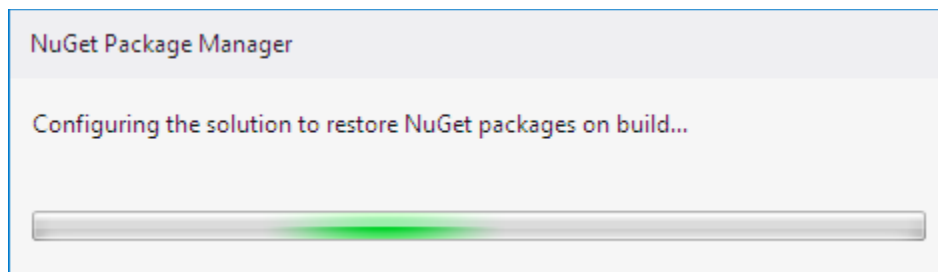

Follow the following step to configure the Student Management System,

1. Open the Student Management Solution file into VS2012
2. Go to the Solution explorer and right click on Solution then select the **Enable Nuget Package Restore**, it will show the following confirmation dialog

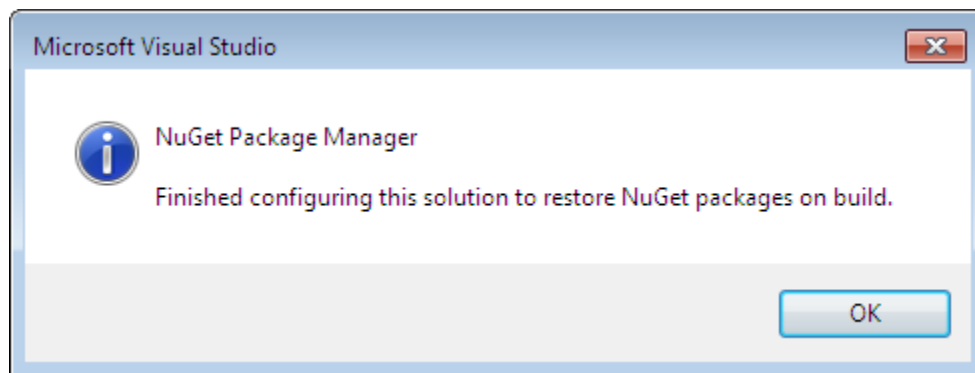

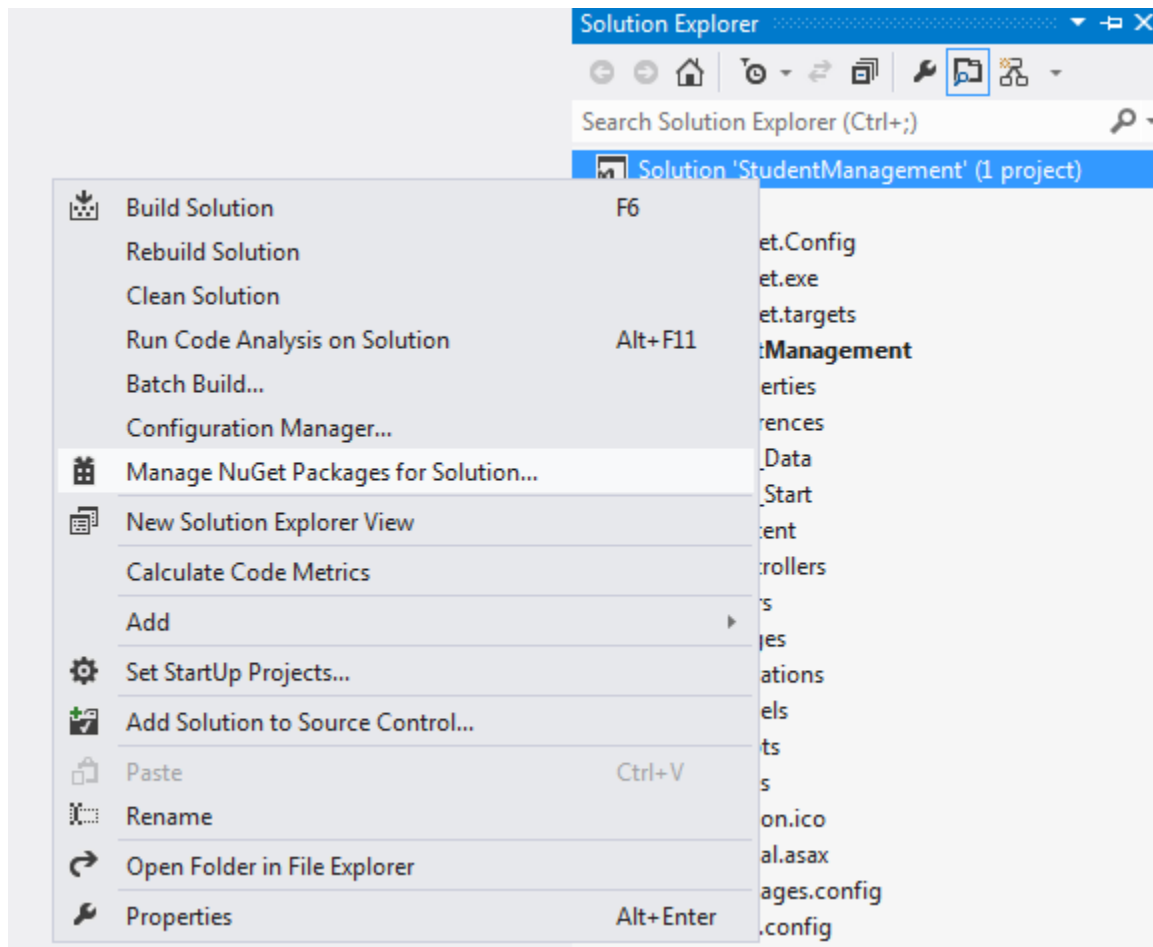

3. Click on Yes button then it will show the following configuration progress dialog

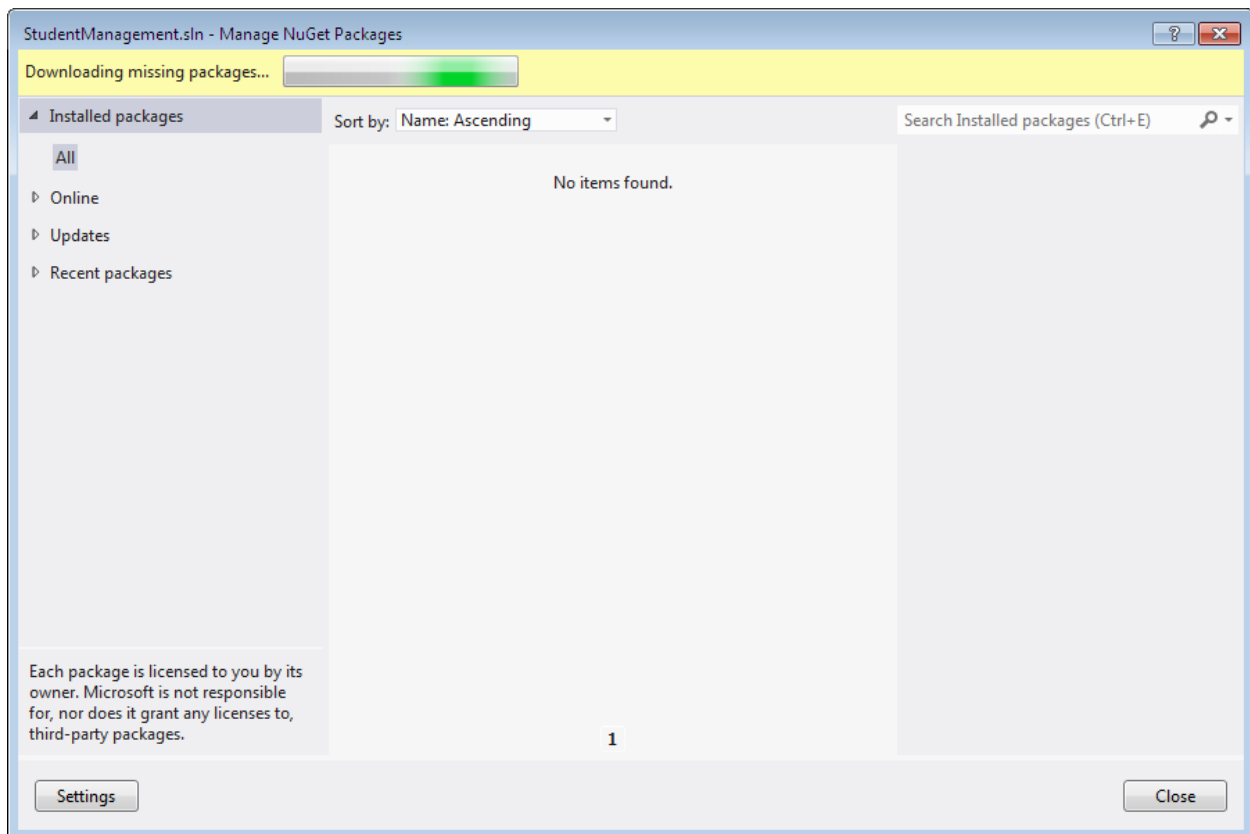

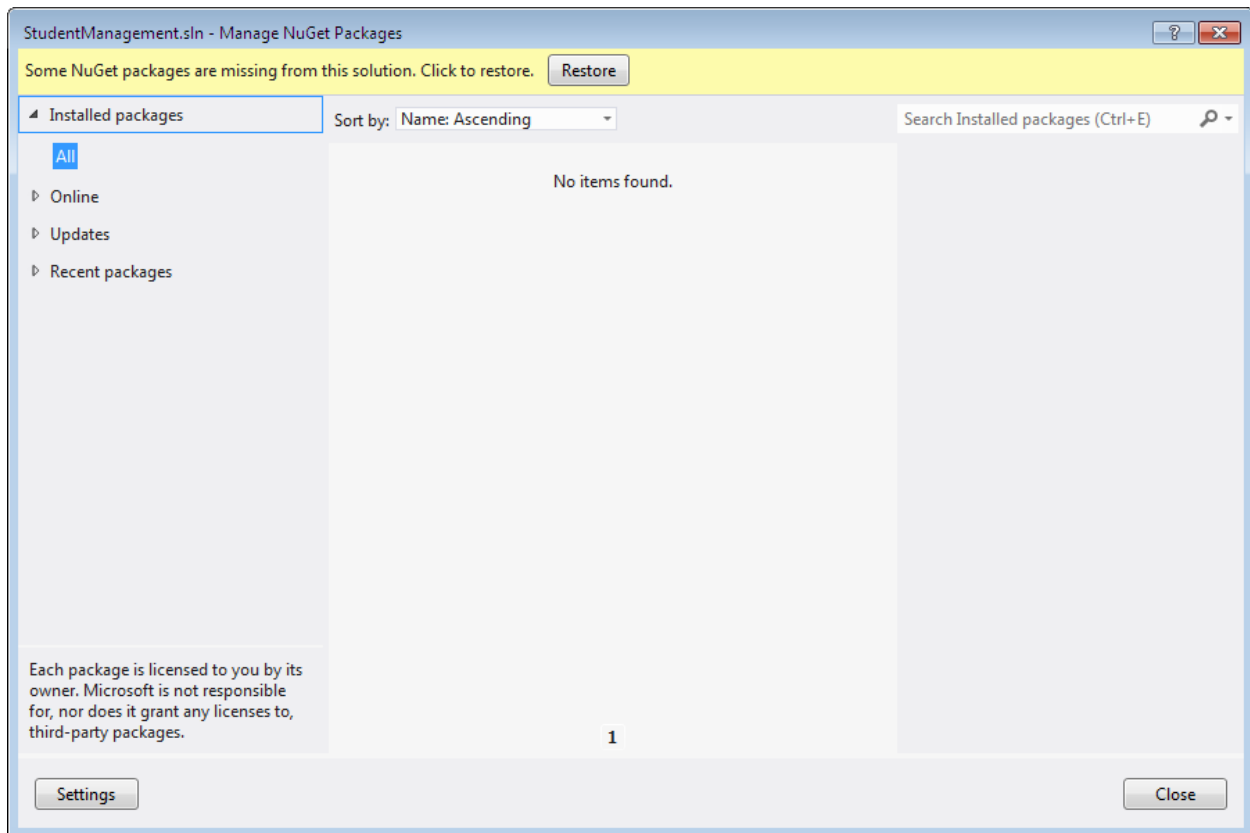

4. After completing the configuration it show the following process completed dialog, click on OK button

5. One more time right click on Solution and this time select **Mange Nuget Packages for Solution**(alternatively you do the same for the project as well),it will show the Manage Nuget Packages dialog as shown below,

6. Here you find a yellow react angle which shows message like “Some Nuget Packages are missing from this solution. Click to restore” as shown below. At end of this message you will find a button which named as Restore, click on it to restore all missing packages.

7. Please be patient until it gets downloaded, once you download you can start running the application
