Resources:

- Snap.svg to animate the SVG elements (<http://snapsvg.io/>)
- Icons from our Nucleo library (<https://nucleoapp.com/>)
- Images from Unsplash (<https://unsplash.com/>)

=====

SASS and CSS

We use SASS and Bourbon (<http://bourbon.io/>) for our resources. If you don't use SASS, just use the .css files that you find in the css folder. You can delete both sass and partials folders.

We have integrated Eric Meyer's CSS reset rules (<http://meyerweb.com/eric/tools/css/reset/>) and Modernizr (<http://modernizr.com/>).
